Commission To Release Public Notices Listing
Commercial FM Broadcast Construction Permit
Applications Received For Filing But Not
Yet Accepted For Tender

Effective June 16, 1986, the Commission will begin releasing public notices listing all commercial FM Broadcast applications for construction permits (CP's) received for filing on or after that date at the Commission. The purpose of these public notice listings is to inform the public concerning FM applications that have been received but not yet accepted for tender.

All commercial FM applications for construction permits received for filing will be assigned an application reference number (ARN) upon receipt in the FCC. The public notices listing received applications will be provided in addition to the procedures announced in Paragraph 31 of Report and Order in Docket 84-750, 50 Fed. Reg. 19936, published May 6, 1985.

The following information for each application will be provided in the public notice listings:

- Name of Applicant
- Application Reference Number (which includes the date of receipt)
- Frequency
- City/State

Consistent with existent policy, if an application for an allocation in the commercial FM non-reserved band is found acceptable for tender, a second public notice of acceptance for tender will be released. If a commercial FM application is found not to be acceptable for tender, a public notice will be released to inform the public that the application was returned as not acceptable for tender. Public notice of receipt will not trigger the start of any petition, pleading or amendment periods.

For further information contact George Enuton at (202) 632-6908.
